m•cloud

Tilt type
Wireless Power Transmitter

Sincerely
The m•cloud team

1. Acknowledgement

Welcome to "m•cloud"
Wireless Charging System

Thank you so much for purchasing
our products.

"m•cloud" is to enable you to charge
IT products easily for your convenience.
Our development team will do our
best to enable you to charge IT
products conveniently in any place
and circumstance in the future.

2. What is "Qi"

Established in December 2008, the
Wireless Power Consortium's mission is
to establish Qi as the global standard for
powering rechargeable electronic
products.

Qi is pronounced "chee" and means
"vital energy." Qi is fully compatible,
so any phone or other device carrying
the logo will work with any charging
surface that carries the logo, regardless
of manufacturer or brand.
Qi charging surfaces can easily be
embedded in automobiles, furniture,
and countertops, making it simple to
charge devices wherever you go.

More information is available at
<http://www.wirelesspowerconsortium.com/>

3. Components

- A. Tilt type Transmitter
- i. Tilt-type Wireless Power Transmitter
 - ii. Adaptor
 - iii. User Manual

4. Use Method

- A. Please connect the adaptor and the tilt-type
transmitter after opening the package.
B. Please plug the adaptor in the power supply.
C. Please put "Qi" receiver on the tilt-type
transmitter.

Note

- 1) Please check the charging area of receiver
(The charging area is the center of the
receiver in general and/or where "Qi"
logo is)
2) Please check the specific charging area
with the manufacturer of receiver.
D. The green LED light is blinking and the
charging is started.

E. About Charging Area

- i. It's the front side where "Qi" logo is.
- ii. Based, it's
When you're not using up-right position,
it's easy to seize the charging area of
receiver by the left and right points.

5. Characteristics

The m•cloud product is a device manufactured
to enable you to use it safely and conveniently
according to launching the latest portable
device in the market.
m•cloud transmitter was designed to use
compatibly with various receivers of m•cloud
and "Qi" mark certified.

A. Max. power supply
m•cloud Compact-type Transmitter can supply
maximum 5W Power to mobile device.

B. Simple Charging
Miscellaneous articles such as power and other
cables scattered around the desk can be clearly
arranged. Also, you don't have to connect a
connector for PC or adaptor with the phone.
Put the phone on the charger, and it will begin
to be charged.

C. Compatibility
Any mobile devices which have the wireless
power receiving system with "Qi logo" can be
charged using Compact-type Transmitter.
(Receiver can have max. 5W power)

7. When troubles occur

Symptom	Troubleshooting
Charging does not work	- Please check if the transmitter is properly connected to the adaptor. - Check if the receiver is connected with devices compatible to it. - Please check if the transmitter has "Qi" logo - Please check if there's a foreign object such as a coin in the transmitter.
The operation lamp does not turn on	- Please check if the transmitter is properly connected to the adaptor. - Check if the receiver is connected with devices compatible to it. - Please check if the transmitter has "Qi" logo - Please check if there's a foreign object such as a coin in the transmitter.

6. Q & A

- A. How is m•cloud charged?
"m•cloud" supplies power for IT products
using electromagnetic induction.
This product is manufactured to safely and
easily supply power for various portable
electric products.
This can replace various sockets and adaptors
necessary for charging portable devices and
other products.
- B. Is m•cloud safe?
Yes, m•cloud transmitters have "Qi" logo and
certified by Wireless Power Consortium.
- C. What is needed to charge my mobile
device with the transmitter?
You can charge your device if the device is
equipped with the wireless power receiver
with "Qi" logo. Comparability certification
by WPC.

8. Specification

- A. Tilt-type Wireless Power Transmitter
- i. Model Name :
MWCT510T
 - ii. Dimensions :
72.2 x 122.8 x 15.0(mm)
 - iii. Input Voltage :
19.0 V
 - iv. Input Current :
over 600mA
 - v. Weight :
105g
 - vi. Operational Temperature : 0C ~ 40C
 - vii. Operational Humid : 0% ~ 90%
 - viii. Qi Certification No. :
TUV13012463KR

1. Use a designed adaptor to supply power
for the m•cloud transmitter.
2. If this product is connected with other
products of PC and laptop computer,
they may be seriously damaged.
3. Do not put magnetic or metal objects on
the transmitter.
Otherwise, the device may work erroneously.
4. If the receiver is deviated from the charging
area while charging, it could cause over heat
issue with the transmitter.

FCC Information to User

This equipment has been tested and found to comply with the
limits for a Class B digital device, pursuant to Part 15 of the
FCC Rules. These limits are designed to provide reasonable
protection against harmful interference in a residential
installation. This equipment generates, uses and can radiate
radio frequency energy and, if not installed and used in
accordance with the instructions, may cause harmful
interference to radio communications. However, there is no
guarantee that interference will not occur in a particular
installation. If this equipment does cause harmful interference
to radio or television reception, which can be determined by
turning the equipment off and on, the user is encouraged to try
to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver,
that to which the receiver is on-needed.
- Consult the dealer or an experienced radio/TV technician for
help.

Caution

Modifications not expressly approved by the party responsible
for compliance could void the user's authority to operate the
equipment.

FCC Compliance Information : This device complies with Part 15
of the FCC Rules. Operation is subject to the following two
conditions: (1) This device may not cause harmful interference,
and (2) this device must accept any interference received,
including interference that may cause undesired operation

NOTE: FCC Radiation Exposure Statement: This equipment
complies with FCC radiation exposure limits set forth for an
uncontrolled environment. This transmitter must not be
collocated or operating in conjunction with any other antenna
or transmitter.

9. Warranty

MAPTech performs the product assurance based on the consumer dispute settlement criteria by item.
When any trouble in product occurs, contact us e-mail (contact@maptech.co.kr).
Compensation is concluded within seven(7) days from the request date.
The content is informed within fourteen(14) days.
The guarantee period is one(1) year for transmitter & receiver, three(3) months for adaptor.

Product Name	Model Name
Purchase Date	Serial No.
Purchased at	Purchase Price

In preparation for refund, please specify the purchase price on the product and attach
the purchase receipt.

Free Service

Consumer Damage Type	Compensation Content	
	Within guarantee period	After guarantee period
When any material repair is required within 10 days after purchase	Exchange of product	
When any material repair is required within 1 month after purchase	Exchange of product	N/A
When the product is damaged during transportation	Exchange of product	
When the exchanged product goes wrong within 1 month	Exchange of product	
When the same defect occurs three times	Free Repair	
When various defects occur four times or more	Exchange of product	Paid Repair
When the product cannot be repaired due to defects in products regardless of the consumer's mistake.	Exchange of product	Exchange the product after deducting the depreciation corresponding to depreciation.

Paid Service

When any trouble occurs due to mistakes in use or unavoidable circumstances, after the lapse of
one year from the date of purchase, MAPTech will provide repair services for the trouble
troubles by disassembly or remodeling, troubles by illegible serial no or natural disasters,
troubles by noncompliance of safety notes, etc.
When the lifetime of consumable parts uses up.
