

Patroller 4

Wireless Bluetooth Transceiver

Patroller 4 is a discreet, wireless bluetooth transceiver used for the collection of data from PCorr+ and Permalog+ devices.

Patroller 4 can rapidly download data via radio, permitting drive-by data collections or lift and shift operation.

Compatibility with the new PCorr+ software and WebCorr app allows data received by Patroller 4 to be used for immediate site correlation or uploaded to PermaNET Web.

Key Features and Benefits

- **Software:**
Easy to use software
- **Quick and easy:**
Operations can be performed with a laptop, tablet or mobile phone (Android or iOS)
- **No External Power:**
Rechargeable battery charged by USB
- **Portable:**
Small, compact and lightweight
- **Wireless:**
Data can be collected wirelessly in a moving patrol vehicle.
- **SMA connector:**
Allows for different antenna types

Applications

Patroller 4 is designed for portability and performance; to download from PCorr+ and Permalog+ devices in both drive-by and lift and shift modes.

Patroller 4 is supplied as standard with 1/4 wave antennas (see image) allowing for compact storage and ease of transfer between vehicles. Extended operational range can be achieved through the use of magnetic mounted or fixed vehicle antennas.

Bluetooth connection conforms with BLE implementation, optimised for use with HWM software.
