

**Application No.: HM155249**

**Date: 7 November 2005**

**FCC ID: RV827915570976**

### **Circuit Description**

The 27.145MHz crystal oscillator drives the base of Q2 the final/buffer amplifier. The modulation provided by IC 1. The output of Q1 has the matching network consisting of C6and L3 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground and Power Source

The antenna consists of a 25cm long metal antenna. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 9 Volt ("6F22" size battery x 1) primary battery.

### **Operation Descriptions**

The transmitter is a toy UFO operating at 27.145MHz band. The transmitter is powered by a 9 Volt battery (6F22 x 1) and the transmitting frequency is crystal controlled. There are 1 button to control the forward reverse motor and director of movement. The operation is achieved by different combinations of form pulse modulating signal on the 27.145MHz carrier frequency.

Remarks:

The transmitter is a 1 Button transmitter.

The EUT continues to transmit while Button is being pressed.

It is Pulse transmitter, Modulation byIC; and type is Pulse modulation.
