FCC ID: RW2BT800U

## **Operation Description**

The EUT is powered by 3VDC battery (2\*1.5V AAA batteries) and have one channel between 470.0-608.0 MHz UHF audio transmitter, it's Occupied Bandwidth is 120kHz, it cannot be tuned by the end user.

During manufacturing process, adjusting the coils L 11-15 (5T2) to get requested frequency, and may exchange 5 capacitors paralleled with them from 3-30 pF if any.

The lowest and highest channel frequency: 470.0 MHz and 608.0 MHz; modulation type:F3E, antenna type: a dedicated antenna, which are designed as indispensable parts of the EUT.
