Distance of antenna: between 30 m and 3 m according the frequencies and the limits.

Antenna height: 1 to 4 meters

Antenna polarization: vertical and horizontal, only the highest level is recorded.

Equipment under test operating condition:

The equipment is blocked in continuous transmission mode, modulated by internal data signal.

Results:

Ambient temperature (°C): 21
Relative humidity (%): 58

Voltage at the beginning of the test (V): 3.2

Voltage at the end of the test (V): 3.08

Percentage of voltage drop during the test (%): 3.8

The polarity column refers to the antenna polarity at which the maximum emissions level is measured.
