**Subject:** FW: part 15 modular approval question

Based on his response, I would specify that the module will be installed in the following OmniSense products :

Sensor  
Gateway  
Installer

Hello Chris, It's possible to obtain a Limited Modular Approval if you specify which specific products the device will be installed in.

Regards,  
Joe

**Subject:** part 15 modular approval question

Hi Joe,

I am seeking modular approval for a 915 MHz transceiver module. It is designed to pass 15.247 without RF shielding. Further, the module will only be used by my company thus I have full control over how it is included in other products. Can I get modular approval without meeting requirement #1, RF shielding?

Best Regards,  
Chris
