The correction was made on page 116 and page 182 to 197.

Today we additionally add the explanation in page 117 to address the limit -25 dBm in page 182 to 197, please use attached report instead.

Page 116

27.53 (m) For Band 7

The emissions be operated in the 2496-2690 MHz band, the attenuation factor of transmitter Power (P) shall be not less than 43 + 10 log (P) dB at the channel edge and 55 + 10 log (P) dB at 5.5MHz

Page 117

5. The limit line is derived from 55 + 10log(P)dB below the transmitter power P(Watts)

$$= P(W) - [55 + 10log(P)] (dB)$$
$$= [30 + 10log(P)] (dBm) - [55 + 10log(P)] (dB)$$
$$= -25dBm.$$

Page 182 to 197:

Limit = -13dBm

Limit = -13dBm

Limit = -25dBm
