RE: Electronic Lifestyle Integration Inc.

FCC ID: S2701180025-ELI

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) New schematics were not received as given in your response. The schematics provided recently are identical to the old schematics and do not include the TX portion of the device as previously mentioned. Please correct.
- 2) Page 45 still mentions measurements < 1 GHz were made at 10 m. However limits appear to be shown at 3 meters and test photos seem to support 3 meter. Please explain at what distance measurements were made and if made at 10 meters, where are correction factors applied.
- 3) Page 46 still mentions measurements > 1 GHz were made at 10 m. Due to FCC rules, limits, and dynamic range issues this is highly unusual. Additionally, limits are cited as 3 meter. Please explain.
- 4) Data on page 55 shows peak data in excess of the average limits. Therefore average data for this must also be provided.
- 5) No emissions appear to be reported above the fundamental level of the TX frequency. Please explain.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
