

Hello Tim,

Please find our replies upon your Oct 16 comment, thanks!!

1. Please find the additional info about the transmitter employed on the EUT just uploaded, which show the transmitter itself is isolated from the host platform and has its own FCC ID granted for the L.M.A. before, and itimplies that the schematic of the transmitter portion would be exempted along the application.

2~5. Please refer to the revised report just uploaded.

Eric
