Trouble Shooting Tips
Caller ID

Problem	Solution
No Display	Try replacing the batteries. Make sure the batteries are properly installed.
	Did you order Caller ID service from your local telephone company?

Telephone	
Problem	Solution
No dial tone	<ul style="list-style-type: none">Check installation: Is the telephone line cord connected to the base unit and the wall jack?Disconnect the base from the wall jack and connect another phone to the same jack. If there is no dial tone in the second phone, the problem might be your wiring or local service.Make sure the battery is properly full.Are the batteries installed correctly?
Dial tone is OK,	<ul style="list-style-type: none">Make sure the tone/pulse setting is but can't dial out correct.
Does not ring	<ul style="list-style-type: none">Try to set the Ringer to a higher level.You may have too many extension phones on your line. Try unplugging some phones. See solutions for No dial tone.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is needed.
- Consult the dealer or an experienced radio/TV technician for help.
