FEDERAL COMMUNICATIONS COMMISSIONS

Authorization and Evaluation Division

7435 Oakland Mills Road
Columbia, MD 21046

Subject: U-NII 6GHz Attestation per FCC KDB 987594 D01 v03
FCC ID: S38-IXM6490

To Whom It May Concern:

We, Invixium Access Inc. attest that this device with FCC ID: S38-IXM6490 complies with device protocol requirements and operational restrictions for indoor client 6XD.

Device Protocol Attestation Statement for Indoor Client 6XD:

- a. As demonstrated in the test report, Contention-Based Protocol is permanently embedded in the module and is not host-dependent.
- b. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- c. This device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.
- d. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

Understanding of Statement acknowledging device restrictions:

- a. Control of or communications with unmanned aircraft systems is prohibited, including drones.

If you have any questions, please do not hesitate to contact me.

Sincerely Yours,
