Taiwan, R.O.C.

Dear Sir,

Thank you for your efforts, and please find below response,

The test report only shows GSM mode measurements. There doesn't appear to be any Power measurements in the GPRS mode included in the report. Can they please be inserted. The worst case Spurious emissions should then be repeated in the frequency which gives the highest GPRS Power measurement.

Response:

Please find below table, the GSM850/1900 powers are the highest than the GPRS class 8 and 10, so that they are chosen the for spurious emissions test.

GSM / GPRS 850	GSM	GPRS Class 8	GPRS Class10
128	32.58	32.54	31.43
189	32.55	32.53	31.5
251	32.50	32.48	31.53
GSM/ GPRS 1900	GSM	GPRS Class 8	GPRS Class 10
512	30.00	29.94	28.47
661	30.03	29.99	28.69
810	30.08	30.01	28.81
