

Dear Tim,

Please find the responses as below:

1. The updated block diagram showed crystal oscillator information for Bluetooth has been uploaded.

For the GSM, would you please check the top of page 5, which shows the baseband frequency?

2. Only one model, GO 715, will be applied for IC. The difference between the two models is the storage media. The Declaration of the difference has also been uploaded.

3. The internal photo showed the antennas has been uploaded.

5. The RF exposure for BT has been uploaded.

6. The updated operation description with corrected modulation has been uploaded.

Additionally, the updated IC form also uploaded.

7. The updated operation description has been uploaded.

8. The updated IC form with corrected model name has been uploaded.

Items 4 and 9 will be solved soon.

BR

Daniel
