RE: TomTom International BV

FCC ID: S4LGO715

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide a single MPE exhibit calculating MPE for co-location of both GSM and BT.
- 2) The operational description was modified to remove reference to BT V2.0 to VT V1.2. However spec sheet information given in the block diagram, parts list, and schematic clearly show a IC that supports BT V2.0. Due to difference in modulation and envelope, certain tests should be repeated for all modulations (i.e. power, bandwidth, band edge, etc.). Please review. Additionally, please add appropriate designator(s) for BT to the IC form.

Timothy R. Johnson
Examining Engineer
