July 5, 2007

Dear Application Examiner:

On behalf of Honeywell Process Solutions, Northwest EMC is submitting this application for Limited Modular Approval of the Wistron CM9 802.11(a)/(b)/(g) radio. The radio, FCC ID: S57-WNMNCM9, will be installed in the supply level assembly Multinode, M/N: WNMN. The radio operates in the 2400-2483.5MHz band for 802.11(b)/(g) mode and in the 5725-5850 MHz band for 802.11(a). The radio will be co-located with Honeywell's 2.4GHz FHSS radio, FCC ID: S57-WNMNFHSS. MPE estimates for this co-located configuration are provided with this application.

Multiple antennas can be used with the EUT. Test report data is provided for the highest gain of each type plus the lowest gain overall per FCC requirements. Antennas are professionally installed. This configuration satisfies the requirements of 47 CFR 15.203.

The technical reports and exhibits demonstrate compliance with FCC rules 47 CFR 15.247 as a DTS transmitter.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
