**Overview**

This application is for the limited modular approval of the Wistron CM9 802.11 radio installed in the Honeywell International's Multinode, model number WNMN. The radio will be co-located with Honeywell's FHSS radio, FCC ID: S57-WNMNFHSS. MPE estimates have been included in this application for the co-located configuration.

The radio operates in the 2400-2483.5MHz range. The device is used as a wireless transmitter network. The radio can utilize three different antennas, two omni antennas and a single sector antenna. The antennas are attached by a professional installer.

**Recommendation**

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
