Dear Application Examiner:

On behalf of Honeywell Process Solutions, Northwest EMC Inc is submitting this application for the limited modular approval of the Honeywell 2.4GHz Frequency Hopping Spread Spectrum (FHSS) radio board, assembly part number 51306301. The FHSS radio board is part of the upper level assembly Multinode. The Multinode model number is WNMN. Honeywell is seeking limited modular approval of the FHSS radio installed in the WNMN. The FCC ID is S57-WNMNFHSS. The radio can be co-located with the Wistron 802.11 (a)/(b)/(g) radio, FCC ID: S57-WNMNCM9. MPE estimates have been included in this application for the co-located configuration.

The radio operates in the 2400-2483.5MHz range. The device is used as a wireless transmitter network. The radio can utilize three different antennas, two omni antennas and a single sector antenna. The antennas are attached by a professional installer. This configuration satisfies the requirements of 47 CFR 15.203.

The technical reports and exhibits demonstrate compliance with FCC rules 47 CFR 15.247. At installation, several power levels will be available to users. Tests were performed at low, mid, and high power levels per FCC rules.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
