

The image shows a rectangular RF module mounted on a green printed circuit board (PCB). The module has a white label with black text. Above the module, there is a gold-colored SMA connector. To the left of the module, there is a row of small, dark components, possibly capacitors or resistors. To the right, there are several yellow circular components, likely capacitors. The PCB has various other components and markings, including a small 'E7' marking and some text that is partially visible on the right edge.

RF MODULE 16363

FCC ID: S5716363

IC: 5731-16363
