<b>FCC ID</b>	S5750025034
<b>Agent</b>	
<b>Approval Type</b>	Class II Permissive Change
<b>Equipment Class</b>	DTS Digital Transmission System
<b>Rule Part</b>	15C

### Overview

This application is for a Class 2 Permissive Change (C2PC) of the Limited Modular Approval, for the Honeywell S5750025034 grant. The reason, for the C2PC, is to allow the S5750025034 radio module to be used in an alternate housing product, model WCX series. The output conducted and radiated (EIRP) and antenna systems (antenna types and gains), for the WCX, are identical to the original S5750025034 grant. The WCX is part of an industrial wireless control network called the OneWireless product family. The RF Exposure condition for the WCX assembly is mobile, >20cm from the head or torso of a user. There are multiple antennas available for use. MPE estimates are provided for each antenna configuration. The WCX must be professionally installed.

Application did not request confidentiality.

### Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
