Declaration of the Uniqueness of Antenna Connector

Date: 12/8/08

To Whom It May Concern:

The antenna and its connector have been specially ordered and manufactured according to our own specifications and dimensions. Therefore a matching antenna that will fit to our device is not available in the market through retail electronics shops. This makes our antenna connector unique and our device meets 15.203 of the FCC rules. It is not a part commonly sold or to be found in the market.

Thank you for your consideration.
