

Difference description

1. MID8125 and MID8127 are identical in schematics and RF modular. MID8125 is a multi-touch resistive touch screen; MID8127 contains multi-touch modes which are resistive touch screen and capacitive touch screen.
2. The position of Touch Panel connector is difference, for MID8125, it is nearby right speaker, but for MID8127, it is close with WIFI antenna connector. so there is a little difference in the PCB layout and printing.
