RE: Family certification of FCC ID: S7R-CK2T1

The Taggle Cockatoo product range is a modular Radio Telemetry Unit (RTU) for IoT devices. FCC ID S7R-CK2T1 covers two variants of the Cockatoo product family which have model numbers starting with:

- CK2-T1-I
- CK2-T1-C

Model CK2-T1-I employs an internal 2dBi monopole antenna.

Model CK2-T1-C is supplied with an SMA antenna connector for use with an external 2dBi patch antenna.

Other than the differences listed above, the radio hardware is identical for both product variants.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Richard Keane', written over a light blue horizontal line.

Richard Keane
