1) RF exposure exhibit sent in reply to last corresp. uses power threshold of July 2002 TCB Exclusion List - that threshold is not applicable for devices subject to RF exposure routine evaluation listed in 47 CFR 2.1093. Please revise filing.

The revised RF Exposure calculation has been uploaded.

> 2) Please explain compliance with 47 CFR 2.1033(c)(14), or revise if appropriate to ensure filing contains data for 2.1046 through 2.1057.

A revised test report summary has been uploaded, to better show the correlation between Part 2 requirements and test results.

3) If not in filing already, please explain how power on grant
> line-item is obtained.

***Power on the grant was calculated from the field strength:
EIRP = E - 95.3 = 78.4 dBuV - 95.3 = -16.9 dBm => 0.02 mW. This differs from the
applicant's Form 731 power of 0.316 mW (-5 dBm) and the discrepancy was not
resolved prior to certification. Grant of Authorization has been amended.***
