Dear Helen,

Re-Q#1: Attached please find the revise test report.

Re-Q#2: The table of the report was type error. The calibration has performed in normal time. Test Attached please find the revise test report.

Re-Q#3: Attached please find the revise User Manual.

Re-Q#4: Thank you.

Best regards,  
Joe

Question #1: The test report (sheet 11 of 27) indicates QP limit @30m is 10 mV/m, which is incorrect. Please update the test report.

Question #2: The test report (sheet 19 of 27) shows a digital multi-meter was past calibration due during the test, thus the test result is invalid. Please explain.

Question #3: The user manual is marked "Confidential". Please note user manual will be open for public review once the grant is issued. So please remove confidential contents from the user manual, then remove the mark of "Confidential".

Question #4: This is for your information, the format of authorization letter is incorrect. Attached is a correct version. Please note paragraphe 2 - anti-drug statement must be included. Please submit correct authorization letter for future submission.

Best regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
