Dear Sir/Madam:

As appointed agent for OFI, Inc., we're re-submitting the Test Report and Internal Photos exhibits for changes described below:

- Section 2.3 ("EUT's technical specifications") of the report is incorrect. Mode of operation should be "Non-continuous, repeat rate = 15Hz (7.5Hz at each antenna)".
- Section 2.5 ("Ancillary Equipment") of the report has redundant information. Ancillary Equipment #1 was not used in these tests and should be deleted, Ancillary Equipment #2 and #3 are correct.
- Previous internal photos exhibit contained old photo of the RF circuit board. The new internal photos now contained the new RF circuit board.

If you have any queries, please do not hesitate to contact us.

Yours truly,

Tri Minh Luu, P. Eng.,  
V.P., Engineering
