

**Trimble Navigation Limited MCS**

345 SW Avery  
Corvallis, OR 97333

September 15, 2010

To whom it may concern,

Trimble Navigation Limited MCS is submitting this application for a Class 2 Permissive Change to FCC ID: S9E-RNGR2410. It was originally certified under FCC 15.247 with limited modular approval because it was not tested in a stand-alone configuration. Now it will be used in a new host device, the Trimble Handheld computer Model Ranger/TSC3. There have been no changes to the radio or its antenna.

The Ranger/TSC3 also contains a WWAN module (FCC ID: S9ERGTSC3WN) and a combo Wi-Fi / Bluetooth module (FCC ID: S9ERGTSC3BW). This application contains spurious radiated emission test report for the new host configuration and RF safety information for the co-located radios.

All of the modules are installed by the client and are not user accessible. The modules will not be sold individually.

Your attention to this matter is greatly appreciated and please contact me if you have any questions.

Best regards,

A handwritten signature in black ink, appearing to read "Bob Grant".

Bob Grant  
Regulatory Engineer  
Trimble Navigation
