Subject of Request: Permission and evaluation to re-use Wifi /Bluetooth test report of model JUNO/T41/5-BWC in application of JUNO/T41/5-BW.

Effective ID: S9E-JNOBW, S9E-JNOBWC

Dear Sirs,

Following the guideline principal as per KDB 996369, we, the undersigned, request to re-use the 15.247 test report from ID: S9E-JNOBWC in application of ID: S9E-JNOBW.

ID: S9E-JNOBW and S9E-JNOBWC contains the same PCB, layout, display, I/O digital IC, and battery spec, and confines in the same enclosure. These two ID employs the equivalently identical chipset, circuit layout, antenna of Wifi/BT with the same default setting of transmitted output power level, and same software/firmware controlling radio parameters.

Verification in the manner of scanning checked is done to justify the test report covering for ID S9E-JNOBWC can be sufficiently and representatively prove its suitability of re-usage of all test measurement of 15.247.

Sincerely,

Bob Grant / Regulatory Engineer
