

Attestation

FCC Laboratory

Date: June 3rd, 2024

To Whom It My Concern,

Ruckus Wireless LLC, declare that our product certified under FCC ID: S9GR670 complies with device protocol requirements and operational restrictions: for Indoor Access Point **6ID**

Access Point use the signal in Transmit Power Envelope (TPE) IE to control the Client transmit power. In case of LPI mode, TPE IE in AP would signal Default LPI Client limit and Subordinate LPI Client limit.

We acknowledge the device restrictions as follow:

1. Low-power indoor Access Point. Access Point operating in the 5.925-7.125 GHz band shall be supplied power from a wired connection, has an integrated antenna, is not battery powered, and does not have a weatherized enclosure.
2. This product will not be marketed for deployment on oil platforms, cars, trains, boats, and aircraft, except that operation of this device is permitted in large aircraft while flying above 10,000 feet.
3. Indoor access points are prohibited for control of or communications with unmanned aircraft systems, including drones.

If there any questions, please do not hesitate to contact us.

Sincerely,

Ivaylo Tankov
