Question #1: The schematic provided in the filing seems an incompleted one. The operational description indicates it uses CSR BC358239A bluetooth chipset, but the chipset does not even show up on the schematic (CSR BC358239A is not a 34-pin chip). Please explain.

[Ans: Please refer to the P5 for update schematic as attachment .](#)

Question #2: The internal photos do not clearly show CSR BC358239A bluetooth chipset. Please provide a bigger and more clear photo.

[Ans: The inteernal photos had been revised, please see P3 as attachment.](#)

Best Regards,

[Amanda](#)
