

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

July 29, 2005

RE: Skyetek, Inc.

FCC ID: SAGH3
ATCB#: ATCB

I have a few comments on this Application.

1. The Block Diagram is not consistent with the requirements of 2.1033(b)(5). Please review.

CFR 2.1033(b) (5) A block diagram showing the frequency of all oscillators in the device. The signal path and frequency shall be indicated at each block. The tuning range(s) and intermediate frequency (ies) shall be indicated at each block. A schematic diagram is also required for intentional radiators.

2. In the future you need to list the FRN on the Form 731 or it will be sent back to the lab for revision.
3. Please be aware the photos cannot be declared confidential unless the equipment is a scanning receiver.
4. Please submit files as pdf so they are converted by the testing lab rather than the FCC. It will help with file size and keep the correct file in the correct place.
5. Please upload label location photos as required by the FCC.
6. Please upload test setup photos as required by the FCC. As a rule test setup photos are required for all Part 15 devices.

Thank you,

Douglas E. Noble
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
