Request for Modular/Limited Modular Approval

Date	e: February 25, 2022				
Sub	ject: Manufacturer's Declaration for	☑ - Modular Approval☐ - Limited Modular Approval	□ - Split Modula□ - Limited Spli		approval
Con	fidentiality Request for: <u>FCC ID: SA</u>	<u>ARMW604</u>			
		sic Requirements – FCC Part 15.212(
		Limited Module Description Must be pproval Requirement	Filled Out on the Fo		ment Met
	The modular transmitter must have its own does not have to rely upon the shielding pro modular transmitter emissions to comply wi between the RF circuitry of the module and installed. Such coupling may result in non-capacitors may be located external to the shi	RF shielding. This is intended to ensure vided by the device into which it is instant the FCC limits. It is also intended to prevany wires or circuits in the device into vecompliant operation. The physical crystant	alled in order for all went coupling which the module is	⊠ - YES	□ - NO(*)
	Details: The module contains a metal shiel the board.	ld which covers all RF components and	l circuitry. The shiel	d is located or	n the top of
	The modular transmitter must have buffered ensure that the module will comply with FC over-modulation. 15.212(a)(1)(ii)			⊠ - YES	□ - NO(*)
	Details: Data to the modulation circuit is l	buffered as described in the operationa	l description provided	d with the app	lication.
	The modular transmitter must have its own pensure that the module will comply with FC supplying circuitry in the device into which	C requirements regardless of the design	of the power	⊠ - YES	□ - NO(*)
	Details: The module contains its own powe	er supply regulation. Please refer to sci	hematic filed with thi	is application.	
	The modular transmitter must comply with t§§ 15.203, 15.204(b), 15.204(c), 15.212(a), attached or employ a "unique" antenna cou antenna, including the cable). The "professi to modules but can apply to limited modular	and 2.929(b). The antenna must either bupler (at all connections between the motional installation' provision of § 15.203	be permanently dule and the B is not applicable	⊠ - YES	□ - NO(*)
	Details: The module connects to one permo	anently attached antenna (PCB anten	nas on board).		
	The modular transmitter must be tested in a inside another device during testing. This is complying with Part 15 emission limits rega Unless the transmitter module will be batter requirements found in Section 15.207. AC of the module must not contain ferrites, unless 15.27(a)). The length of these lines shall be least 10 centimeters to insure that there is no equipment. Any accessories, peripherals, or shall be unmodified or commercially availal	intended to demonstrate that the modulardless of the device into which it is every powered, it must comply with the AC or DC power lines and data input/output they will be marketed with the module length typical of actual use or, if that less coupling between the case of the modus support equipment connected to the module.	e is capable of ntually installed. line conducted lines connected to (see Section ngth is unknown, at alle and supporting dule during testing	⊠ - YES	□ - NO(*)
	Details: The module was tested stand-alor	ne as shown in test setup photographs j	filed with this applica	tion.	

	Modular Approval Requirement	Requirement Met	
6.	The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748). If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for	⊠ - YES	□ - NO(*)
	equipment authorization. 15.212(a)(1)(vi)		
	Details: There is a label on the module as shown in the labeling exhibit filed with this application. He instructions are shown in the installation manual filed with this application.	ost specific lai	beling
7.	The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)
	Details: The module complies with FCC Part 15C requirements. Instructions to the OEM installer are installation manual filed with this application.	e provided in	the
8.	The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)
	Details: The module meets mobile device exclusion levels as shown in the RF exposure information filed with this application.		

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

Details: <example - N/A>

	Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)				
	Requirement	Requirement Met			
1.	For <u>non-Software Defined Radio</u> transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280.	□ - Provided in Separate Cover Letter	□ - N/A		
	Details: The firmware of the device can not be modified or adjusted by the end user as description.	s described in described in a	pperation		
2.	For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812.	- Provided in Separate Cover Letter	⊠ - N/A		
	Details: <example -n="" a=""></example>				

Split Modular Requirements			
Requirement	Provided in Manual		
 For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained. 	☐ - Provided in Separate Cover Letter	⊠ - N/A	
Details: <example a="" n="" –=""></example>
