Re: RFID Circuitry (13.56MHz Transmitter)

The RFID circuitry is split up between 2 PCBs: 14717-01 & 14717-03.

- 14717-01: This PCB holds the TI TRF7960A device (Multi-Standard Fully Integrated 13.56-Mhz RFID Analog Front End And Data-Framing Reader), along with its supporting circuitry.
- 14717-03: This PCB serves as the antenna for the RFID Tx/Rx communication.

Below are images of the two boards.
