RE: PC Worth Int'l Co, Ltd.

FCC ID: SBCMP3200

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The Bluetooth schematic is not high enough resolution to satisfy the FCC. Please correct.
- 2) Is there an explanation for the 6.1 dBm to 13 dBm power difference mentioned in the last set of comments?
- 3) There are a few errors still in the RF exposure information:
 - a) Please label column for Pout conducted. I believe this should be in dBm.
 - b) The maximum antenna gain here is 2 dBi, while this was questioned in the last set of comments and the antenna information provided still suggests 3 dBi.
 - c) The Pout EIRP appears to be miscalculated. Using 6.1 dBm and 3 dBi, I show an EIRP of 8.13 mW. Please reverify.

Timothy R. Johnson
Examining Engineer
