RE: Bridgestone Corporation

FCC ID: SBDITTWB315F02

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) FYI.....For measurements > 1 GHz, you may use 54 dBuV/m average limits specified by 15.209 since they are > 47.7 dBuV/m.
- 2) FYI.....Please show both peak (no duty cycle correction) and average (with duty cycle correction) data in future applications. This makes proofing simpler.
