Federal Communications Commission
Washington, DC 20554.

Dear Sir or Madam:

Nordic ID has made C2PC process to it's RFID module NUR-05WL2 with FCC ID SCCNUR05WL2. Please refer to "FCC_Cover_letter_for NUR05WL2_C2PC".

As written in our C2PC document, we would like to integrate two FCC certified radio modules into our host product Medea 815-1A. However, during the time when SAR testing have been made we have planned that we will certify our host product and that's why there is FCC ID for Medea and not for NUR Module and Laird SSD40NBT module. SAR testing and test report "Official-ES201550006 Nordic ID Medea FCC SAR Report" is made for host product Medea 815-1A and is valid.

Sincerely,

A handwritten signature in blue ink, reading "Rauno Nikkilä".
