副本抄送 :

主旨 : FW: LanReady Technologies Inc., FCC ID: SCD0013, Assessment NO.: AN07T7259, Notice#1

Hi Gina,

Please address following issues.

Q#1: Please confirm the output power used during the test first. Technical review may be completed after this issue is confirmed.

Ans: sorry, the output power is IEEE 802.11b: 13.39 dBm; IEEE 802.11g: 14.00 dBm during the test.

Q#2: Test report page 15 indicated that the setting of RBW and VBW were set at 1MHz and 100kHz for measuring peak mode of radiated band edge test. It doesn't comply with test procedure. Please be noted that for measuring peak mode above 1GHz, both RBW and VBW should be in 1MHz. Please re-do the test.

Ans: Please see the revised test report as the attachment.

Q#3: Please indicate the USB dongle from the external photos when connecting with the alternated patch antenna; also, please remove those photos which do not relate to this Class II permissive change filing from internal and external photos.

Ans: The USB dongle connected with Notebook PC. Please see the revised internal and external photos as the attachment.

Best Regards,

Lucy

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee.

Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
