Federal Communication Commission
Authorization and Evaluation Division

Re: Clarification on Model Number.

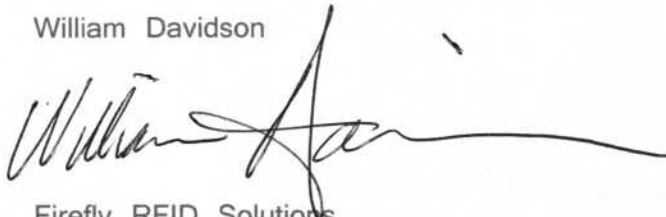

FCC ID: **SD8FFP466M12P1**

To Whom It May Concern:

The model number tied to the SAR evaluation is the host device (7527C-G2 Workabout Pro) for which our Firefly RFID Expansion Option Card – model number VER551-11 is installed. The SAR testing was performed with the Workabout Pro Host as the intended operational configuration of the VER551-11.

Sincerely,

William Davidson
