

Sensus Non-Disclosure Memorandum

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus FlexNet module (See Appendix 1) in accordance with the FCC rules on modular approved devices. The Sensus FlexNet Transceiver is professionally installed inside various Sensus Distribution Automation Products (See Appendix 2). The module label will be located either on the side of the host device as necessary or on the front of the host device and will display both the FCC and IC IDs of the FlexNet module, again, when necessary. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public, is professionally installed, and is only serviceable by Sensus, or designated technicians.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

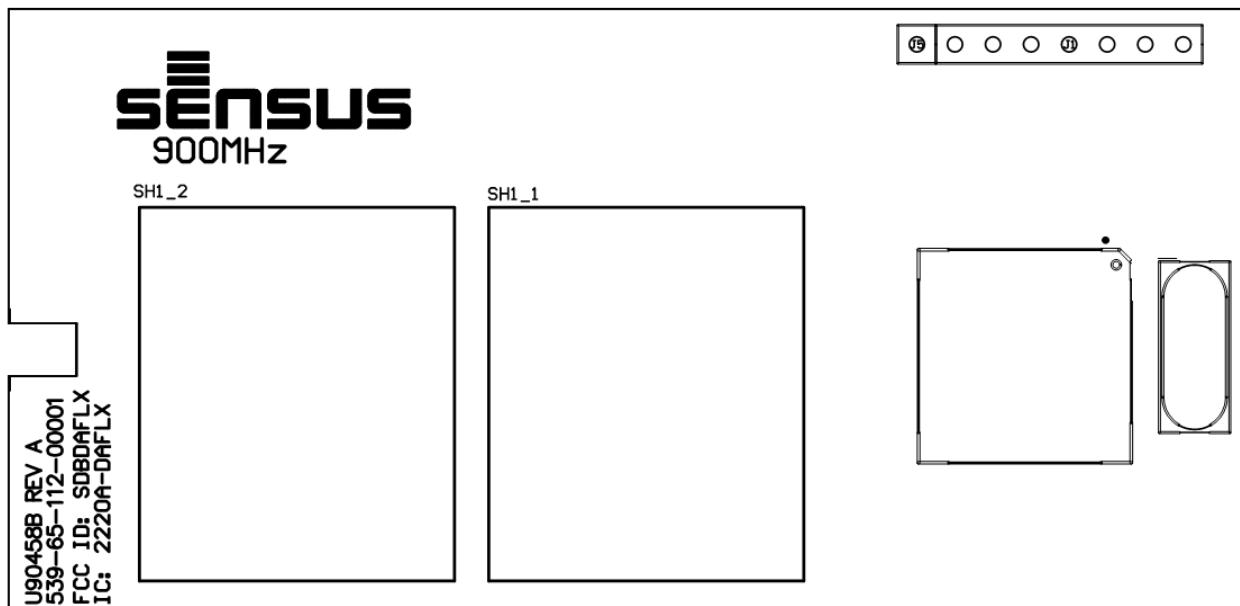

SENSUS
The Measure of the Future
