

## Sensus Non-Disclosure Memorandum

May 2, 2012

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus DAHAN01 module (See Appendix 1) in accordance with the FCC rules on modular approved devices. The Sensus DAHAN01 Transceiver is professionally installed inside various Sensus and partner LCM products. The module label will be located either on the side of the host or on the front of the host and will display both the FCC and IC IDs of the DAHAN01 module. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public, professionally installed, and is only serviceable by Sensus, or designated technicians.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

  
The Measure of the Future
