Re: FCC ID: SDBGFL, IC: 2220A-GFL

To Whom It May Concern:

This application is being filed for a class II permissive change on the Sensus Metering Systems model GFL under the identifiers indicated above.

The model GFL has four RF electrically identical variants, or printed circuit board modules each designed to interface with a different gas meter assembly. Three of these modular devices were approved in the original application for certification.

This application for a class II permissive change is to include the four variant. The only difference from the previously approved devices is the size and shape of the printed circuit board which allows for integration into a specific gas meter assembly.

The characteristics which have degraded from those originally reported for certification were evaluated and are presented with this application.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kirby Munroe', is written over a horizontal line.
