

Sensus Non-Disclosure Memorandum

July 20, 2011

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus TGB20 (See Appendix 1) in accordance with the FCC. The Sensus TGB20 Transceiver is professionally installed. The regulatory label will be located on the rear of the enclosure and will display both the FCC ID of the TGB20. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public (See Appendix 2), which is professionally installed, and is only serviceable by Sensus, or designated technicians. When installed, the Sensus TGB20 cannot be accessed by anyone other than Sensus staff or designated technicians simply because the product is located within and enclosure that is key-locked within a utility or Sensus owned and access controlled area.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

SENSUS
The Measure of the Future
