## Sensus Non-Disclosure Memorandum

August 6, 2013

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus USBXCVR2 (See Appendix 1) in accordance with the FCC rules for approved devices. The Sensus USBXCVR2 Transceiver is for professional use only. The label will be located in a visible area on the transceiver rear cover and will display all necessary and pertinent information about the product. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public, professionally installed, and is only serviceable by Sensus, or designated technicians.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

**SENSUS**  
The Measure of the Future

**Richard Daniel** | Director, Engineering NPI and Project Management
