

Sensus Non-Disclosure Memorandum

February 11, 2011

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus VGB (See Appendix 1) in accordance with the FCC rules. The Sensus VGB Transceiver is professionally installed and operated within utility owned or contracted vehicles for the purpose of meter reading/drive by testing and verification. The certification label will be located at the rear of the product and will display both the FCC and IC IDs of the product. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public, professionally installed, and is only serviceable by Sensus, or designated technicians.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

SENSUS
The Measure of the Future
