

Sensus Non-Disclosure Memorandum

February 10, 2012

Sensus OEMs:

This memorandum serves as an additional agreement between Sensus and its OEMs stating that the OEMs will use the Sensus M4601 (See Appendix 1) in accordance with the FCC. The Sensus M4601 Transceiver is professionally installed. Confidentiality of the internal photos and the technical manual is being requested because this is a non-consumer device which is not accessible by the general public (See Appendix 2), professionally installed, and is only serviceable by Sensus, or designated technicians. When installed, the Sensus M4601 cannot be accessed by anyone other than Sensus staff, utility staff, or designated contractor staff, because the product is located within a utility or contractor controlled vehicle.

Please feel free to contact me directly should there be any questions regarding this matter.

Respectfully,

SENSUS
The Measure of the Future
