Evaluation of Sense Technology Co. Ltd S1853 FHSS reader
FCC id: SDQSENSE1853

I have assessed the above referenced submission for the Sense Technology S1853 and found it to be compliant. The product is a 900MHz FHSS RFID reader.

The following were noted and resolved during the evaluation.

1. USB port

A clarification was requested concerning the USB mini-port shown on the module and in the schematics. A statement was received from the manufacturer clarifying that the use of this port is for production purposes and not for connection as a computer peripheral.

2. FHSS operation

There was no description of the frequency hopping in the original application. A statement was subsequently received in respect of FCC Guidance Document DA 00-705.

3. Confidentiality

The original confidentiality letter was not addressed to TCB with company letterhead paper so an amended version was provided.

Yours sincerely
