

UL-EMC
1285 Walt Whitman Road
Melville, New York 11747

To Whom It May Concern:

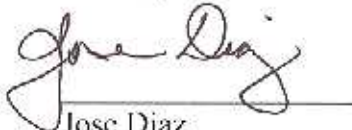

This is to document the changes between the current 4-inch transducer and the new 6-inch transducer. The traces were extended 2 inches to provide coverage over the full 6-inches of the new transducer.

All other components between the two transducers remain the same:

- Resistors
- Connector
- Cable length and type
- Thickness of traces

Please address any questions to the undersigned.

Thank you,

Jose Diaz
