Hi Mike,

Please refer to the following for our replies. Thank you for your advice.

Best regards,
Ting

Question #1: The user manual said, "When charging the headset, the indication light (green light) will turn on and the headset will turn the power off automatically". But the test report indicated that the power line conducted emission test was done during "Normal Linking in charging mode", which does not agree with what the user manual said. Please explain what the bluetooth headset was linking with during the test.

Ans #1: After checking again, the test was done under the charging mode and report has been revised as attached file.

(See attached file: BT-204 Test Rpt revised 1105.pdf)

Best regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
