Sounds

In order to make the operation easier, the Headset generates several sounds:

Switch-on tone: 2 short and high beeps

Switch-off tone: 2 short and low beeps

Pairing tone: Music tone

Voice tag tone: Default Voice tag tone of cell phone

Mute tone: 2 beeps every 3 sec

Ring tone: Default incoming call ringing tone of cell phone

Operation

Charge Before First Time Use

The Headset contains a rechargeable and changeable Li-ion Battery, you can charge the battery independently or with the Headset.

The Battery will not be full charged when is it unpacked. It is recommended to place it on charge for 1.5 hours before first time use; the charging description below shows how to do this:

Step 1 Plug the travel charger into an available AC supply socket and connect the travel charger with the charging cable.

Step 2 Plug the small connector lead of the charging cable into the matching socket at the top of the battery. (At the mean time, the red LED indicator on the charging cable will turn on)

Step 3 After 1 to1.5 hours of charging time, the red light will turn off. The battery is then fully charged.

The fully charged battery can last up to 6 to 8 hours of talk time; up to 200 hours of stand-by time.

After first time use, it only takes less than 1.5 hours to full-charge the battery.

NOTE   When the battery is low, the blue LED indicator will become less bright than in normal state. When the power is run down, the indicator will turn off.

Wearing the Headset(Picture)

Switch On the Headset

Step 1 Press the P Key and hold for about 8 seconds until a switch-on tone is heard in the earpiece.

Step 2 Release the button. (The blue LED indicator will then shine for 5 times)

Switch off the headset

Step 1 Press the P Key and hold for 3 to 5 seconds until a switch-off tone is heard in the earpiece.

Step 2 Release the button. (The blue LED indicator will then stop flashing and become steady off)

Preparing the Headset For Use

Pairing and Connecting

PIN Code: The PIN code for the Headset is preset to 1234. It will needed for pairing.

Before the Headset can communicate, it must be paired to the companion device it will use with, such as a cell phone. This is ensure the Headset only communicates with the device chosen by the user and not any other Bluetooth devices in range.

Pairing information is stored by the Headset and can be changed at any time.

The exact process to pair the Headset will also depend on the device it is paired with. The user manual for that device will give instructions on how to do this. In all cases, the Headset will need to be put into PAIRING mode, which is described as follows:

Step 1-1 Before pairing starts, please make sure that the Headset is in OFF mode. If it is not, switch it off.

Step 1-2 Press the P Key and hold for 8 seconds, the Headset will then be switched on.

Step 1-3 Keep holding the button until the Headset has been switched on for 3 seconds.

Step 1-4 If the blue indicator start flashing fast continuously, the Headset is now in PAIRING mode.

Step 1-5 Release the button.

(If you are wearing the Headset while the Pairing is completed, a pairing tine will be heard in the earpiece)

Step 2 Enter the Bluetooth section on your cell phone, search for the Bluetooth device, select the searched Headset and start pairing.

Step 3 The cell phone will then ask for PIN Code for the Headset which is preset to 1234, then confirm it.

Step 4 After confirmation, the pairing music will be generated, then the Headset is ready to connect with the cell phone.

Step 5 Press the P Key, then the Headset will be connected with the cell phone.

NOTE

a. If the Headset is not under PAIRING mode, the Headset wont be able to found by the cell phone. There fore, please put your Headset into PAIRING mode before the cell phone start searching for the Bluetooth device.

b. If the pairing work is not be able to finished with a period of time(about 1 minute), the Headset will automatically return to STANDBY mode, and replace the former pairing record(if there was a former one). If so, you may need to repeat Step 1 to 5 until the pairing work is completed.

Connecting

- After the paring is completed and before answering or initiating any calls, another press on P Key is needed to set up the connection between the Headset and the cell phone.
- When the connecting is ongoing, the blue LED indicator will flash twice every 3 seconds. After the connection is set up, the indicator will flash 3 times every 3 seconds.

NOTE

a. If there's not any communication through cell phone under Connecting mode for over 2 minutes, the Headset will automatically disconnected with the cell phone.

b. After connected with the cell phone, if there's a necessity of connecting with other Bluetooth device(i.e. Bluetooth Dongle on PC), only 1 short press on the P Key is needed. However, the connection between Headset and cell phone will be cut off. If want to reconnect with the cell phone, you may need to repeat all the pairing and connecting procedures.

Initiate a Call

Through the cell phone:

Dial the number or choose from the phone book to initiate a call. After the line is connected, the sound will be transferred into the Headset right away.

Voice Call:

Press the P Key, waiting for the Voice call indication tone, then speak out the voice commend preset in your cell phone to make a call.

Receive a Call

There's an incoming call, when the Headset is:

In PAIRING mode but not yet connected:

Answer the call through the cell phone first, in the mean time, press the P Key to connect the Headset and the cell phone, then another press on the P Key to transferred the voice into the Headset.

Incoming call ringing tone is heard in the earpiece: Press the P Key to answer the call.

(Blue LED indicator will shine 4 times every 3 seconds)

OFF:

Please answer the call by your cell phone first. Then switch on the Headset, press the P Key to reconnect, the voice will then be transferred into the Headset.

End a Call

When finish a call, press P Key and the call will be ended.

Volume Adjustment

Every press on the V   Key will increase the volume for 1 level. Every press on the V   Key will decrease the volume for 1 level.

Mute

During a call, press V   Key or V   Key and hold for 2 to 3 seconds, the Headset will then enter MUTE mode. The other side will then not be able to hear any sounds from your side until you unmute the Headset.

To Unmute the Headset, only needs one short press on V   Key or V   Key.

In and Out off Range

Within the range of 10 meters, unless there is any other wireless devices such as Wireless LAN AP or Microwave oven, or there wouldn't be any noise.

If the Headset moves out of range during a call, the connection will be terminated and the Headset will returned to PAIRING mode. And you won't be able to keep talking through the Headset. But you should be able to keep talking through your cell phone.

(NOTE: When you are back into 10-meter range, you may reconnect to talk through the Headset.)

Connect with PC or PDA

PC

A Bluetooth dongle should be connected with the PC first, and set up the Bluetooth software (The operation guide of setting up, please check the user manual of your Bluetooth dongle) After the set-up is completed, you may then pair and connect the PC with the Headset through the software.

PDA

Only Bluetooth compatible PDA can set up a connection with the Headset. Please check the user manual of your PDA to see how to pair and connect.

Reset

If for any reason that the Headset remains non-function, it may be reset by the following method:

Please switch off the Headset, check if the battery is already run down. If it is, you just need to charge the battery. If not, please delete the pairing information records on your cell phone, and re-pair and re-connect with the cell phone again.

FCC Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.   End users must follow the specific operating instructions for satisfying RF exposure compliance.   This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Notice: Any changes or modification not expressly approved by the party responsible could void the user's authority to operate the device.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.
