Dear Sir:

The following application is submitted on behalf of our client, Miltope Corporation, for evaluation of their Wireless LAN Access Point in accordance with Part 15 paragraph 247 of the rules for a Class II Permissive Change. The device was tested to the requirements of the aforementioned sections of the rules and was found to be in compliance.

Changes to the device from originally certified equipment include a second test configuration in which a reduction in output power was performed and the antenna extension coaxial cable of type RG-58 with minimum length of 6 feet was removed. With the exception of removing the external coaxial cable and reducing output power, no other changes to the device were made.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'.

R. Sam Wismer
