

Model 2875352 - RF Exposure

1. Justification for RF exposure classification of Mobile.

The product is mounted in the dashboard of the vehicle and is not easily removed. A distance of greater than 20 cm is maintained from any persons except when the key is inserted in the product and the RFID tag scanned. At that point the operators hand is within the 20 cm limit.

2. Maximum transmit time is one minute. If an RFID Tag is present the transmit time is reduced. Transmission only occurs at the time the key is inserted into the ignition lock and turned to start the engine.
